WORK EXPERIENCE

Amn Pardazan Kavir
DevOps Coordinator

Tehran, Iran
Nov. 2022 - Now

- Coordinated a team of 3 engineers in implementing and optimizing core infrastructure services.
- Helped architect and implement a microservice architecture.
- Integrated Technologies to achieve scalability, provisioning and deployment.
- Collaborated to improve service performance and reliability through monitoring, logging and incident response.
- Actively participated in team meetings, knowledge sharing sessions and scrum ceremonies to improve both myself and my teammates.
- Made custom scripts for deployment and error handling.
- Contributed to common branching strategies and remade the Ci/Cd pipeline.
- Made Ansible playbooks for upkeep and deployment of services.

Hoodad Tech
DevOps Engineer

Tehran, Iran
Sep. 2020 - Nov 2022

- Designed and implemented key components of the company's network infrastructure.
- Contributed to the development and implementation of DevOps and SDLC best practices and tools.
- Streamlined deployment processes by implementing a centralized repository and automating the deployment system.
- Managed and maintained server infrastructure, including virtualization, alerting systems and server management.
- Implemented documentation culture and tools.
- Played the role of Scrum Master for a couple of months.
- And even though I don't work at Hoodad anymore, I still consult them about their services and products.

Razman.Co
Infra Admin - SRE

Tehran, Iran
Jul. 2016 - Sep . 2020

- Administered, co-located and self hosted servers.
- Managed the network infrastructure.
- Gave testing and troubleshooting solutions to ensure compatibility with industry standards.
- Set up local repositories/artifactories
- Implemented and managed radio connections with different branches of the company.
- Dockerized different projects with languages such as Java, PHP and .NET.
- Automated build processes for both Stage and Production.
